PHILIPS

Highlights

Virtual Surround Sound

Philips Virtual Surround Sound produces rich and immersive surround sound from a less than five-speaker system. Highly advanced spatial algorithms faithfully replicate the sonic characteristics that occur in an ideal 5.1-channel environment. Any high quality stereo source is transformed into true-to-life, multi-channel surround sound. No need to purchase extra speakers, wires or speaker stands to appreciate room-filling sound.

Dolby Atmos®

Dolby Atmos® adds the dimension of overhead sound — a new sensation of height that puts you in the middle of the action. The full 3D audio atmosphere realistically positions objects moving right above you, rendering everything from quiet conversations to whirlwind action with astonishing clarity, richness and depth. It all comes together as a truly exciting home cinema sound experience, triggering your senses to immerse you deeper in the action than ever before.

Dual HDMI inputs

HDMI connections are essential for the enjoyment of the best picture and sound quality. The product features two HDMI inputs, allowing you to connect your video sources like Blu-ray players or games console directly to the soundbar. Your soundbar can then connect to your TV through a single HDMI TV output to provide greater simplicity and ease of use.
